Wavin TreeTank:

A Smarter Solution for Greener, More Loveable Cities

Urban tree canopies are vital for green, equitable cities, yet root systems often disrupt infrastructure. Wavin TreeTank provides an innovative and sustainable underground solution, protecting trees while enhancing urban livability.

With several successful projects in Europe and Latin America, **we're ready to break ground in the US** using our already 'tried & tested in the US' AquaCell.

Discover how Wavin TreeTanks help trees and communities thrive together, improving tree equity for all people.

The Wavin TreeTank

allows trees to grow faster and helps to prevent roots from destroying roads and pavements.

Our solution provides the roots with water, and access to air and nutrients, while at the same time acting as a barrier against the roots causing damage at ground level.

Ask about our latest version of AquaCell used for TreeTanks in the US.

Why Tree Tanks?

- Improve physical and mental health
- Increase property value
- Promote biodiversity by creating a habit for birds and other wildlife (biodiversity)
- Improve air quality by taking in carbon dioxide, producing oxygen and filtering harmful dust and pollutants from the air we breathe
- Help reduce urban heat island effect of 8 - 15°F
- Eliminate the risk of roots penetrating roads, sidewalks and pipelines
